

**There are a few ways to get replacement shutters for your home:**

**1.** Contact Mid-America, the original manufacturer, at:

<http://thetapcogroup.com/brands/mid-america/shutters>

The shutters are wineberry in color, 58-3/4" tall and 15" wide. Our homes are over ten years old, so there may be a charge for the shutters-though some residents have reported that Mid-America is still supplying them at no additional cost.

**2.** If you do not want to go through Mid-America for replacement shutters, there are low cost ways to procure them locally. They can be purchased for around \$50/pair at any local home improvement store, or you can get them for only \$10/pair at the Habitat ReStore in East Norriton.

**PLEASE NOTE:** These places may not have the 58-3/4" tall, 15" wide shutters in stock. If this is the case, 59" tall and 15" wide shutters (wineberry color) will suffice.
